Join the [Aol](#) sponsored coding competition and win a Samsung Gear S2 Sport smartwatch

How does it work?

"CodeYourRestaurant" is an online multi player coding competition. The goal is to implement a doner-kebab-restaurant managing logic in JavaScript. Your code will compete against everybody else's code every 15 minutes*. On 16.5.2016 11:00:00 UTC all code will be frozen and the game will run for 3 additional days. The code which won the most runs between 16.5.2016 11:00:00 UTC and 19.5.2016 10:59:59 UTC** wins the competition. In the very unlikely event of a tie, the winner will be selected by random selection between those. The winner will be shown on the homepage and will get the price via mail.

What do I need to do?

Go to [CodeYourRestaurant.de](#), create an account and implement your own restaurant managing logic. To do so you need to implement 7 call back methods which manages real-estates, hiring, menu creation, food ordering and food distribution. For more information the website offers a [tutorial](#), [FAQ](#), an [API documentation](#) and last but not least every new account starts with a default implementation.

To create an account you need to provide an email address. Aol will use this address to contact you to provide information about open positions. See the [registration page](#) for all details.

When can I start?

Start right now, though you have time to complete your code until 19.5.2016 11:00:00 UTC.

Der Rechtsweg ist ausgeschlossen. Mitarbeiter der ADTECH GmbH, Aol Global Operations Ltd. / AOL & AOL Technologies Ireland Ltd. sind vom Wettbewerb ausgeschlossen.

*) Depending on the number of players, the system will execute a game run after the

**) As the processing takes a couple of minutes, a game will count if started before 19.5.2016 10:59:59 UTC.
